Prosecuting Attorneys Salaries

RE: Salaries

After having read the articles concerning this issue, it appears their salaries are not that much out of line. This was not in the amendment voted on by the people. The legislature should quit rewriting the constitution. It's interesting that they think their salaries should come before funding the budget. I hope you will consider a lesser increase. It would be nice if the legislature were to have you set state employee's salaries. I believe you would see their salaries are the ones that are falling behind. Thank you for your time.
